01 · WHAT IS THE AI SOVEREIGNTY NETWORK™?

The AI Sovereignty Network™ (AISN) is Africa's premier professional network dedicated to African AI governance, AI policy, AI strategy, and technological self-determination. Founded and led by Dr. Sanjay Benjamin - Founder of Africa's AI Sovereignty Movement - AISN provides the institutional backbone for the continent's AI sovereignty agenda.

AISN is not a think tank. It is not a discussion forum. It is a working network of credentialed professionals - drawn from government, enterprise, academia, cybersecurity, law, finance, and civil society - who are actively building the institutions, frameworks, policies, and partnerships that Africa needs to own its AI future.

Headquartered at www.aisovereignty.network and operating across 9 nations, AISN functions as the institutional arm of Africa's AI Sovereignty Movement. It advises governments, trains professionals, develops standards, and builds the partnerships that translate the AI sovereignty agenda from vision into tangible outcomes.

"Africa's AI sovereignty will depend not only on technical capability, but also on the strength of the governance, participation, and decision systems."

- Kgolo Mbangi, Inner Council - AI Sovereignty Network · South Africa

02 · WHY AI SOVEREIGNTY MATTERS

Artificial intelligence is the defining infrastructure of the 21st century. Every major economic, political, and social system will operate on AI within the next decade. For Africa - home to 1.4 billion people

and the world's youngest population - the question is not whether AI will shape the continent. It is who controls that shaping.

Today, the vast majority of AI systems deployed across Africa are designed, owned, and governed outside the continent. African data flows into systems built by others. African governments adopt AI policies written by external consultants. African enterprises deploy AI tools whose architecture they neither understand nor control.

AI sovereignty is the deliberate, structured effort to change this. It means building African institutions capable of governing AI. Developing African talent capable of building AI. Establishing African policy frameworks capable of protecting African interests. And creating African capital vehicles capable of funding African AI futures.

- A sovereign Africa designs its own AI systems - not just adopts others
- A sovereign Africa governs its own AI - not waits for external regulators
- A sovereign Africa trains its own AI professionals - not imports expertise
- A sovereign Africa funds its own AI future - not depends on foreign capital

"What we lack is the political will to treat AI as infrastructure and NOT innovation theater."

- Ebrima N. Ceesay PhD, Inner Council - AI Sovereignty Network

03 · NETWORK STRUCTURE

AISN operates through a structured three-tier model: an Inner Council of four senior advisors who anchor strategic direction; six Network Members who lead specific domain pillars; and three Observers who contribute specialist knowledge and represent key institutional perspectives.

04 · PROPRIETARY FRAMEWORKS

AI SN operates two proprietary frameworks that anchor all advisory, training, and assessment work. These frameworks are the primary intellectual property differentiator of the network and underpin all client engagements.

The 7-Pillar AI Sovereignty Framework™

A national-strategy-level framework for measuring and building AI sovereignty across all critical dimensions. Used for government assessments, AI readiness evaluations, and national AI strategy development.

#	PILLAR	COUNCIL ANCHOR	FOCUS
01	Data Sovereignty	Kennedy Maweu	African data governed by Africans, for Africa
02	Infrastructure	Ebrima · Moe · Ronnie	Owning compute, cloud, and connectivity
03	AI Capability	Prince Onyeji · Felix Njeh	Building Africa-born AI systems and talent
04	Talent Sovereignty	Elias Machingambi	Developing Africa's own AI workforce

05	Financial Sovereignty	Rindai Chiremba / ABAN	African capital funding African AI futures
06	Regulatory Sovereignty	Meghan Waters · Arthur Sidney	African-designed governance frameworks
07	Strategic Partnerships	Dr. Sanjay Benjamin	Global alliances serving African interests
08*	Human Systems	Kgolo Mbangi	Inclusive governance and decision-making (emerging)

The SOVEREIGN AI™ Framework

A board-level AI governance framework structured across 9 pillars. Designed for enterprise boards, regulators, and senior leadership teams. Provides a structured approach to AI oversight, risk management, and accountability at the governance level.

05 · WHAT AISN DELIVERS

ADVISORY SERVICES · National AI Strategy Support · AI Governance Frameworks · AI Readiness Assessments · Board AI Governance · AI Risk Management · AI Policy Development	TRAINING & CAPACITY BUILDING · AI Literacy for Leaders · AI Governance for Boards · Responsible AI · Prompt Engineering · AI Workforce Transformation · Government AI Programmes
CERTIFICATIONS · CASD - Certified AI Sovereignty Designate · CASP - Certified AI Sovereignty Professional · CSAA - Certified Sovereign AI Advisor · AI Governance for Boards (short) · AI Literacy for Leaders (short)	RESEARCH & STANDARDS · Africa AI Sovereignty Index · AI Governance Benchmarks · AI Readiness Studies · Policy Papers and White Papers · Framework Licensing

06 · ECOSYSTEM PARTNERS

AISN has established a growing ecosystem of strategic partners spanning Africa, the diaspora, and global AI governance institutions. Every partnership is structured to advance the AI sovereignty mission while generating commercial value for KRCIIS and its network members.

PARTNER	GEOGRAPHY	FOCUS
NeuroSec AI	USA · Global	AI Runtime Security · Uganda MoICT
GAIGI Geneva	Switzerland · Global	AI Governance · Geneva Summit
Neo Coeur Intelligence	Francophone Africa · 21 Nations	AI Sovereignty
Yamalé	Pan-African	Legal Sovereignty Infrastructure
Think Ahead With AI	India · Africa	AI Training · UNESCO Bid
ArtsEnvoy.ai	Kenya · East Africa	AI Innovation
AI Crusader Network	USA · Africa	AI Advocacy · 1,000 Members
The Sidney Group	Washington DC	US Policy · Government Relations

07 · HOW TO ENGAGE WITH AISN

The AI Sovereignty Network engages with governments, institutions, enterprises, and individuals through four primary channels:

ADVISORY MANDATES

Engage AISN and KRCIIS as your AI governance advisor, AI strategy partner, or capacity building provider. Short-term and retainer-based arrangements available.

TRAINING PROGRAMMES

Commission customised AI training for your organisation - from AI literacy to board governance. Delivered in-person, virtually, or through Dubs AI Studio's learning platform.

PARTNERSHIPS

Partner with AISN on joint bids, donor-funded programmes, continental initiatives, or research projects. AISN welcomes partnerships that advance African AI sovereignty.

NETWORK MEMBERSHIP

Qualified AI governance, policy, legal, and technology professionals may apply for Network Member or Observer status. Applications reviewed directly by the Founder.

"21 nations cannot afford to be spectators in the architecture of their own AI future."

- Herman NOUBI, Neo Coeur Intelligence · Francophone Africa (21 Nations)

Africa does not need permission to own its AI future.
